

Dylan Caballero

Senior Full-Stack Software Engineer

Florida, USA | caballerodylan96@gmail.com | linkedin.com/in/dylan-caballero-54963b185 | github.com/Dcaba024 | portfolio-nine-coral-23.vercel.app

PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 5+ years of experience delivering secure, scalable enterprise applications for Texas.gov, serving millions of Texas residents. Deep expertise in React, TypeScript, Next.js, Node.js, and Identity & Access Management — including ForgeRock, OAuth 2.0, and MFA systems. Proven record of building authentication platforms, document-processing pipelines, and fraud-prevention controls in highly regulated government environments. Increasingly leveraging AI (OpenAI, n8n, AI agents) to modernize workflows and deliver outsized impact.

CORE TECHNICAL SKILLS

Frontend	Backend	Security & IAM	Cloud / DevOps	AI & Automation
React · Next.js TypeScript · Redux JavaScript	Node.js · Express PostgreSQL · REST APIs Java · Spring Boot	OAuth 2.0 · JWT ForgeRock IAM MFA · SSO · reCAPTCHA	AWS · Vercel Docker · CI/CD GitHub Actions	OpenAI APIs · n8n AI Agents · LangChain Prompt Engineering

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Nov 2020 – Oct 2025

Deloitte — Texas.gov & MyTexas Digital Platforms

- Architected and led OAuth 2.0 authentication workflows integrated with ForgeRock IAM, securing account access for millions of Texas residents across state digital services.
- Built enterprise MFA systems supporting SMS, Email, Voice Call, Authenticator Apps, and Security Keys — providing layered account protection across all citizen-facing portals.
- Delivered Google reCAPTCHA Enterprise integration to eliminate automated abuse and suspicious account activity on high-traffic government applications.
- Engineered self-service account-management flows covering password updates, credential recovery, phone verification, and MFA enrollment — reducing dependency on live support.
- Developed document-upload infrastructure with multi-file validation, PDF generation, PDF merging, and secure backend integration supporting citizen-facing services.
- Implemented device-profiling solutions capturing browser and environment metadata for risk-analysis workflows, strengthening fraud detection.
- Integrated React front-ends with Java and Node.js APIs powering authentication, identity verification, and user account lifecycle management.
- Led WCAG accessibility remediation — semantic HTML, ARIA enhancements, keyboard navigation, and screen-reader support — across all critical user journeys.
- Participated in full SDLC: architecture reviews, feature development, QA, production deployments, incident response, and code reviews.
- Collaborated with architects, security specialists, product owners, and stakeholders to ship secure, scalable releases on government timelines.

ENTERPRISE IMPACT HIGHLIGHTS

- Secured government systems serving **millions of users** through robust IAM and authentication architecture.
- Reduced manual support burden by delivering self-service account recovery, MFA enrollment, and credential management.
- Modernized citizen document workflows — multi-file upload, PDF generation, validation — improving processing speed and accuracy.
- Strengthened fraud prevention through reCAPTCHA Enterprise and device-profiling risk-analysis integrations.
- Improved platform accessibility and WCAG compliance across every critical citizen-facing user journey.

PROJECTS

AI Resume Analyzer — SaaS Platform

Stack: Next.js · TypeScript · PostgreSQL · OpenAI · LangChain · CrewAI

- Built ATS scoring, keyword analysis, and resume-job matching using multi-agent AI workflows.
- Generated AI-powered improvement recommendations and candidate alignment scores via OpenAI integrations.
- Delivered a full SaaS experience with authentication, database persistence, and a polished Next.js UI.

AI Automation Workflows

Stack: n8n · OpenAI APIs · AI Agents · Webhooks · REST APIs

- Designed event-driven automation systems orchestrating approval workflows, content-generation pipelines, and cross-application integrations.
- Built intelligent AI agents for dynamic decision-making, multi-step reasoning, and autonomous task execution.

Professional Portfolio Website

Stack: Next.js · TypeScript · Vercel

- Developed a fully responsive portfolio showcasing enterprise engineering work, technical projects, and skills.

EDUCATION

Bachelor of Arts in Computer Science

Florida International University (FIU)
