

Dylan Caballero

AI Automation Engineer | AI Solutions Engineer | AI Agent Developer

Florida, USA | caballerodylan96@gmail.com | github.com/Dcaba024 | portfolio-nine-coral-23.vercel.app

PROFESSIONAL SUMMARY

AI Automation Engineer and Full Stack Software Engineer with 5+ years of experience building enterprise software, AI-powered applications, and workflow automations. Proven track record delivering secure, scalable systems at Deloitte serving millions of users. Deep expertise in agentic AI workflows (n8n, LangChain, CrewAI), LLM integrations, Python development, identity & access management, and modern full-stack development. Seeking to drive measurable business impact through intelligent automation.

TECHNICAL SKILLS

AI & Automation n8n · OpenAI API · Claude API · LangChain · CrewAI · AI Agents · Agentic Workflows · Prompt Engineering · LLM Integrations

Languages Python · JavaScript · TypeScript · Java

Frontend React · Next.js · Redux · Tailwind CSS · Material UI

Backend Node.js · Express.js · Python (Flask/FastAPI) · Spring Boot · REST APIs · Microservices

Security & IAM ForgeRock IAM · OAuth 2.0 · JWT · MFA · SSO · Authentication & Authorization

Cloud & DevOps AWS · PostgreSQL · SQL · Docker · CI/CD · GitHub Actions · Vercel

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer

Nov 2020 – Oct 2025

Deloitte — Texas.gov & MyTexas Digital Platforms

- Architected and led development of authentication, account-management, and identity workflows powering millions of Texas residents using React, TypeScript, Node.js, ForgeRock IAM, and OAuth 2.0.
- Delivered Google reCAPTCHA Enterprise integration to harden security and eliminate automated abuse across government-facing applications.
- Implemented multi-factor authentication supporting SMS, Email, Voice, Authenticator Apps, and Security Keys.
- Built self-service account recovery, password management, phone verification, and MFA preference flows, reducing support ticket volume.
- Engineered advanced multi-file upload pipelines with PDF generation, validation, and backend integrations for citizen-facing services.
- Integrated ForgeRock and Java-based APIs driving authentication, authorization, and full user-account lifecycle.
- Led WCAG compliance remediation — semantic HTML, ARIA enhancements, keyboard navigation, and screen-reader support — improving accessibility scores across all platforms.
- Diagnosed and resolved complex production issues spanning authentication, MFA enrollment, accessibility, and API integrations in high-availability environments.
- Partnered with architects, QA, product owners, and stakeholders to deliver secure, scalable solutions on aggressive government timelines.

FEATURED AI PROJECTS

BabyDaddy.com — AI Legal Assistant Platform — babbydaddy.vercel.app/

Stack: Next.js · TypeScript · Python · OpenAI · LangChain · AI Agents

- Built an AI agent that delivers state-specific legal guidance for fathers navigating custody, parenting time, child support, and communication disputes, reducing reliance on costly attorney consultations.
- Designed conversational workflows that organize case timelines, build evidence checklists, and generate targeted questions for attorney meetings.

- Implemented state-aware logic to tailor legal information and next-step recommendations to the user's jurisdiction.

AI Resume Analyzer — SaaS Platform

Stack: Next.js · TypeScript · Python · PostgreSQL · OpenAI · CrewAI · LangChain

- Designed multi-agent orchestration pipelines that compare resumes to job descriptions, detect skill gaps, and produce ATS optimization recommendations.
- Built candidate alignment scoring and actionable career-insight generation, leveraging LangChain chains and CrewAI agent roles.
- Delivered a full SaaS experience with authentication, database persistence, and a polished Next.js UI.

AI Automation & Agent Development

Stack: Python · n8n · OpenAI API · Claude API · LangChain · REST APIs

- Designed end-to-end AI-powered automations using n8n workflows and LLM integrations that orchestrate API calls, process business data, and eliminate repetitive manual tasks.
- Built intelligent agents capable of dynamic decision-making, multi-step reasoning, and autonomous task completion across business workflows.

EDUCATION

Bachelor of Arts in Computer Science — Florida International University

TARGET ROLES

AI Automation Engineer · AI Solutions Engineer · AI Agent Engineer · Full Stack AI Engineer · Developer Advocate (AI) · IAM Engineer
