

Dylan Caballero

AI Automation Engineer | AI Solutions Engineer | AI Agent Developer

Florida, USA | caballerodylan96@gmail.com | GitHub: Dcaba024 | Portfolio: portfolio-nine-coral-23.vercel.app

PROFESSIONAL SUMMARY

AI Automation Engineer and Full Stack Software Engineer with 5+ years of experience building enterprise software, AI-powered applications, workflow automations, identity-management platforms, and customer-facing digital experiences. Experienced with n8n, OpenAI APIs, AI agents, LangChain, CrewAI, React, TypeScript, Node.js, ForgeRock IAM, and OAuth 2.0. Passionate about using AI to automate business processes and deliver measurable impact.

AI & TECHNICAL SKILLS

Category	Technologies
AI & Automation	n8n, OpenAI API, Claude API, AI Agents, Agentic Workflows, LangChain, CrewAI, Prompt Engineering, Workflow Automation, LLM Integrations
Frontend	React, Next.js, TypeScript, JavaScript, Redux, Tailwind CSS, Material UI
Backend	Node.js, Express.js, Java, Spring Boot, REST APIs, Microservices
Security & IAM	ForgeRock IAM, OAuth 2.0, JWT, MFA, SSO, Authentication & Authorization
Cloud & Data	AWS, PostgreSQL, SQL, Docker, CI/CD, GitHub Actions, Vercel

PROFESSIONAL EXPERIENCE

Deloitte | Full Stack Software Engineer | Nov 2020 – Oct 2025

- Supported Texas.gov and MyTexas digital platforms used by millions of Texas residents. • Led development of authentication, account-management, and identity workflows using React, TypeScript, Node.js, ForgeRock IAM, and OAuth 2.0.
- Delivered Google reCAPTCHA Enterprise integration to strengthen security and reduce automated abuse across government applications.
 - Implemented MFA solutions supporting SMS, Email, Voice Call, Authenticator Apps, and Security Keys.
 - Built self-service account recovery, password management, phone verification, and MFA preference-management experiences.
 - Developed advanced multi-file upload solutions with PDF generation, validation, and backend integrations supporting citizen-facing services.
 - Engineered integrations with ForgeRock and Java-based APIs powering authentication, authorization, and user-account lifecycle management.
 - Improved accessibility through screen-reader support, semantic HTML, ARIA enhancements, keyboard navigation, and WCAG compliance remediation.
 - Diagnosed and resolved complex production issues involving authentication, MFA enrollment, accessibility, and API integrations.
 - Collaborated with architects, QA teams, product owners, and stakeholders to deliver secure, scalable government solutions.

FEATURED AI PROJECTS

AI Resume Analyzer (SaaS Platform)

Built with Next.js, TypeScript, Python, PostgreSQL, OpenAI, CrewAI, and LangChain. Developed multi-agent workflows that compare resumes against job descriptions, identify skill gaps, generate ATS recommendations, score candidate alignment, and provide actionable career insights.

AI Automation & Agent Development

Designed AI-powered automations using n8n, APIs, and LLM integrations. Built intelligent agents capable of orchestrating API calls, processing business data, generating AI responses, and automating repetitive workflows.

TARGET ROLES

AI Automation Engineer • AI Solutions Engineer • AI Agent Engineer • Full Stack AI Engineer • Developer Advocate (AI) • IAM Engineer

EDUCATION

Bachelor of Arts in Computer Science — Florida International University
