

DYLAN CABALLERO

Full Stack Software Engineer | AI Engineer

SUMMARY

Full Stack Software Engineer and AI-focused developer with 5+ years of experience building scalable web applications and AI-powered systems. Strong background in React, TypeScript, Python, Java, and cloud-native development with hands-on experience designing and deploying AI agents, LLM-powered workflows, and data-driven applications. Proven ability to integrate AI solutions into production systems with secure APIs, cloud infrastructure, and modern data platforms.

CORE SKILLS

React, TypeScript, JavaScript, Next.js, Python, Java, Node.js, REST APIs, JWT, OAuth 2.0, Docker, CI/CD, Google Cloud Platform, BigQuery, Kafka, Snowflake, PostgreSQL, SQL Server, OpenAI APIs, AI Agents, Prompt Engineering, LLM Orchestration

AI & MACHINE LEARNING EXPERIENCE

Designed and built AI-powered applications leveraging large language models for resume analysis, document processing, and automated decision workflows. Developed autonomous and semi-autonomous AI agents to analyze data, generate insights, and interact with backend services. Integrated AI pipelines with REST APIs, cloud storage, and databases to deliver production-ready AI features.

EXPERIENCE

Deloitte – Full Stack Software Engineer (2020–2024)

Designed and maintained full-stack applications using React, TypeScript, Node.js, Python, and Java. Built secure REST APIs and implemented policy-based authorization patterns. Containerized services with Docker and deployed via CI/CD pipelines. Collaborated with data and analytics teams on reporting pipelines and data integration workflows in regulated environments.

PROJECTS

AI Resume Analyzer (SaaS)

Built an AI-powered SaaS platform using React, TypeScript, Python, and PostgreSQL. Implemented LLM-based resume-to-job matching, scoring algorithms, and feedback generation. Deployed scalable cloud services and integrated secure authentication and payment workflows.

EDUCATION

Bachelor of Arts in Computer Science
