PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer with 5+ years of experience building secure, scalable enterprise applications across frontend and backend systems. Strong background in Java, JavaScript, React, Node.js, REST APIs, SQL, and cloud-based development. Proven success delivering mission-critical software in regulated environments, integrating complex enterprise systems, and collaborating with cross-functional teams to ship high-quality solutions. Adept at bridging frontend and backend development with a strong understanding of Java-based services, API integrations, microservice architectures, and modern software engineering best practices.

CORE TECHNICAL SKILLS

Languages	Java, JavaScript, Python, SQL, HTML5, CSS3
Frontend	React, Next.js, Redux, Tailwind CSS
Backend	Node.js, Express.js, Java REST APIs, Spring Boot
Databases	PostgreSQL, SQL, Relational Data Modeling, NoSQL Concepts
Cloud / DevOps	Docker, CI/CD, AWS Fundamentals, Vercel
Tools	Git, GitHub, Postman, VS Code
Other	REST APIs, SOAP/Web Services, OAuth 2.0, JWT, ForgeRock IAM, Agile/Scrum

PROFESSIONAL EXPERIENCE

Deloitte — Full Stack Software Engineer | Nov 2020 – Oct 2025

- Engineered and maintained enterprise-scale applications supporting Texas.gov using React, Next.js, Node.js, and Java-based backend services.
- Integrated frontend applications with Java RESTful APIs powering authentication, identity management, and business-critical workflows.
- Partnered with backend engineers in Java/Spring Boot environments to design, enhance, and troubleshoot distributed microservice integrations.
- Contributed to backend API enhancements and service contract improvements for Java-based enterprise systems.
- Implemented secure multi-factor authentication workflows including OTP, email verification, and hardware token support.
- Integrated with ForgeRock IAM Java-based identity platforms to deliver secure authentication and authorization capabilities.
- Diagnosed and resolved complex frontend/backend integration issues, improving reliability, stability, and user experience.
- Supported CI/CD deployment pipelines and participated in Agile/Scrum ceremonies, sprint planning, and paired programming sessions.
- Collaborated with QA, product owners, and business stakeholders to debug, test, and deliver production-ready enhancements.
- Helped drive security and compliance improvements for government-facing applications.

PROJECTS

AI Resume Analyzer (SaaS Application)

- Built an AI-powered resume analysis platform using Next.js, Node.js, Python, PostgreSQL, and OpenAI APIs.
- Developed backend processing pipelines for job description comparison, AI scoring, and document analysis.
- Designed advanced multi-agent workflows using CrewAI and LangChain for intelligent resume feedback.
- Implemented secure authentication, subscription billing, and payment processing integrations.
- Optimized LLM token usage and backend inference pipelines to reduce operational costs and improve performance.

EDUCATION

Bachelor of Arts in Computer Science — Florida International University
